Control

Index

'Industry' is a diverse community with similarities and differences alike. Each industrial sector, application, and objective presents its own unique challenges, from boosting production output and product quality to ensuring energy efficiency and managing expansions or scalability. Yet, the biggest challenge often lies in coordinating numerous subcontractors to meet specific needs.

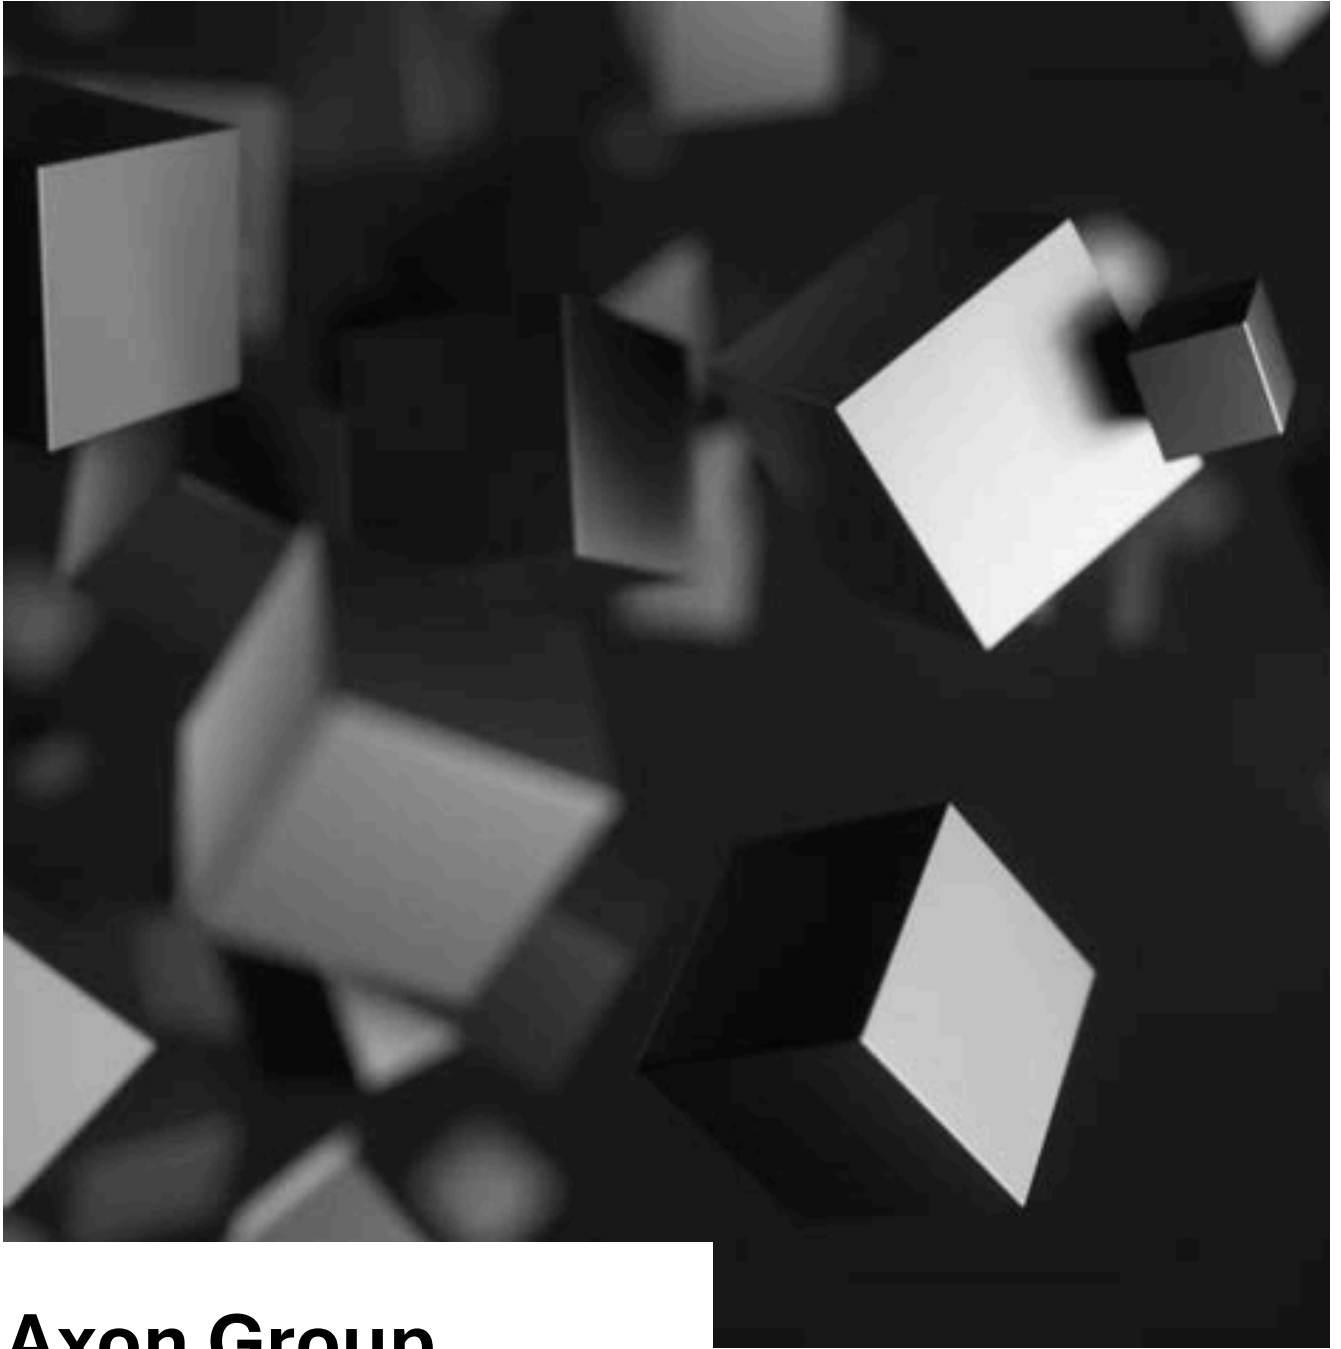

Wouldn't it be simpler to access a single gateway offering a variety of experts, resources, and solutions, all backed by the reliability of a larger group?

Meet Axon Group, your comprehensive solution for industrial needs in six dynamic domains: water, air, powder, noise heat-x, and control.

Axon Group

The industrial solutions' square

Welcome to Axon Group, where diverse industrial challenges meet their match. Our mission is to bring together the finest minds and technologies in water and air purification, powder coating, noise control, heat/cold technology and control/automation. At Axon Group, we provide the essential building blocks for your projects, ensuring you have the expertise and resources to overcome any obstacle.

AXON GROUP: FROM 1974 TO TODAY

Our story begins in 1974 with Almeco, a family-owned company specialising in air and water technologies. Through continuous innovation and a deep understanding of our customers' evolving needs, Almeco grew into a pioneer in the industry.

This commitment to progress led to the founding of the Axon Group in 2004. What started with a focus on air and water management has grown into a multifaceted organisation capable of addressing a wide range of industrial challenges.

Today, with over 50 years of experience and still family-led, Axon Group is active in six dynamic domains: water, air, powder, noise, heat-x, and control. The underlying synergies between these divisions allow us to provide the most comprehensive solutions. Our in-depth expertise in each of these areas enables us to enhance our customers' productivity and sustainability while reflecting our commitment to innovation and continuous improvement.

SOLUTIONS THAT MEET AND EXCEED INDUSTRY STANDARDS

Quality and safety are non-negotiable. At Axon Group, we have extensive experience in delivering solutions that meet a wide range of industry certifications. Whether your project requires ISO 9001, VCA**, ATEX, or other specific standards, we have the expertise to ensure compliance, upon simple request.

Why partner with Axon Group?

We offer a range of unique benefits, all designed to ensure the success of your project.

■ COMPREHENSIVE SOLUTIONS

Whether you need a single, high-quality component or a complete, custom-engineered system, we provide solutions that are perfectly tailored to your requirements. We are your all-in-one partner, from initial consultation to final delivery and beyond.

■ UNMATCHED EXPERTISE

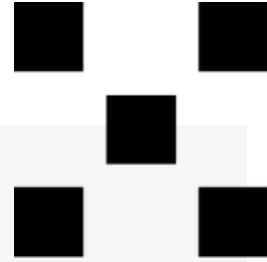

Our team of specialists brings extensive knowledge and hands-on experience to every project. This deep expertise ensures we can tackle even the most complex industrial challenges with confidence and precision.

■ STRATEGIC LOCATIONS

With our headquarters in Mouscron (BE) and additional sites in Aalter, Aalst, Wingene, Douvrin (FR), and Echt (NL), we are always close by.

■ COLLABORATIVE APPROACH

We work closely with you, integrating seamlessly into your operations to deliver tailored solutions that drive success.

Achieve more with Axon Group

At Axon Group, we understand the challenges of modern industries. Our solutions are designed to help you meet your goals and overcome any obstacle. Count on us as your partner in excellence, providing the expertise and support you need to succeed. Together, we can build a stronger, more resilient future for your business.

Our cornerstones for your success

Our company culture is built on a few core values. Across all our divisions, our teams are united by a shared commitment to excellence, collaboration, and innovation.

This teamwork allows us to go beyond the usual limits and deliver truly integrated solutions that consistently meet the changing needs of our clients.

VERSATILE

We're not easily boxed in

Axon Group boasts a spectrum of specialised entities, each excelling in distinct fields.

Whether it's rapid component delivery, customised engineering solutions, or niche applications, our diverse expertise ensures an answer to every industrial challenge

INNOVATION

We don't cut corners

Innovation is at the core of Axon Group's mission. We push boundaries to pioneer advancements in industrial technologies, from air and water treatment systems to precision coatings, ensuring our solutions exceed industry standards and client expectations.

COLLABORATIVE

Every angle adds value

Our teams work together perfectly, combining their knowledge and resources to create integrated solutions. Your personal contact person connects you to our entire network, making project management and support simple, especially for large, all-in-one projects.

ROCK SOLID

Just like a sturdy structure

With over half a century of industry leadership, Axon Group stands as a pillar of stability and trust. Our commitment to transparency, ethical practices, and enduring partnerships underscores every interaction, ensuring reliability and peace of mind.

One Group, Infinite Solutions

At Axon Group, we bring together the expertise of several specialised entities to tackle the most diverse industrial challenges. Our solutions cover six complementary domains.

FLUIDS

Fluid is a vital resource, especially in industry. Axon Group delivers tailored solutions for treatment, reuse, and sustainable fluid/water management.

AIR

Air quality is now both a regulatory and environmental priority. Axon Group provides ventilation and filtration systems that ensure healthy, efficient operations.

POWDER

Protecting product quality starts with the right coating. Axon Group designs complete surface treatment solutions with pretreatment, ovens, and powder coating systems.

NOISE

Noise and vibration affect both people and machines. Axon Group develops custom acoustic and isolation solutions to ensure safety, comfort, and reliability.

HEAT-X

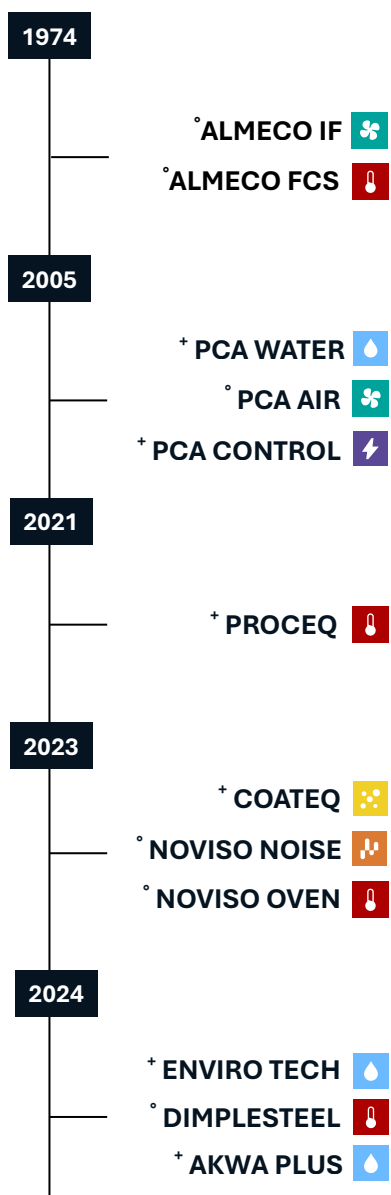

Heat is never just waste, it's potential. Axon Group offers advanced heat exchangers, cooling systems, and ovens to optimise energy efficiency across processes.

CONTROL

Every process needs precision and oversight. Axon Group's Control solutions integrate smart automation and monitoring to boost efficiency, safety, and consistency.

Our companies

Six domains, endless expertise

° Founded

* Joined Axon Group

ALMECO IF

Since 1974, Almeco has engineered industrial fans that keep air moving in critical applications worldwide. Our fans are built for durability, energy efficiency, and reliable performance in the harshest environments.

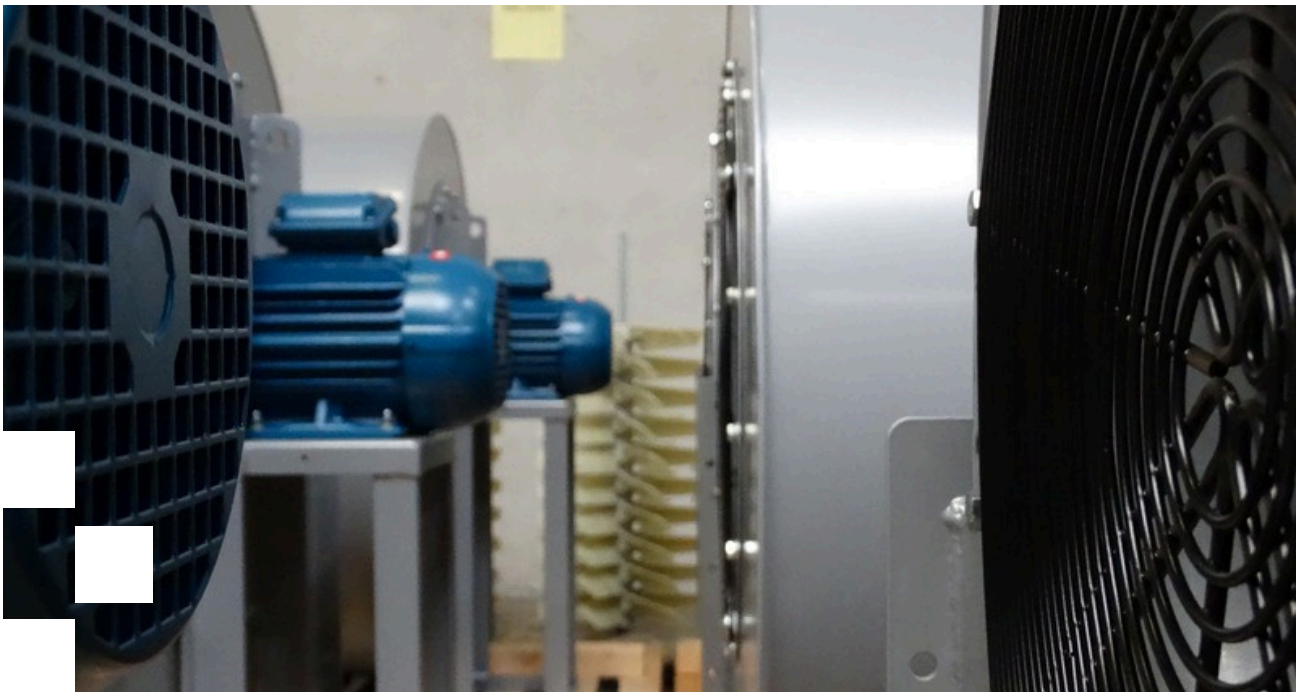

CUSTOM INDUSTRIAL FANS

We design and manufacture fans tailored to meet specific airflow, pressure, and process needs. Custom engineering ensures every fan fits perfectly within the client's system, guaranteeing efficiency and long-term reliability.

ENERGY OPTIMISATION

Our fans are engineered to deliver maximum performance with minimal energy use. By reducing power consumption, clients save significantly on operating costs while lowering their environmental footprint.

Almeco IF delivers efficient and reliable air movement for industrial applications

HEAVY-DUTY PERFORMANCE

Built with robust materials, Almecco fans are designed for continuous 24/7 operation under demanding conditions.

This durability ensures dependable performance, even in industries with extreme environments.

SERVICE & SUPPORT

We offer expert installation, ongoing maintenance, and after-sales care. This support ensures systems run at peak efficiency throughout their lifecycle, reducing downtime and extending equipment life.

ALMECO FCS

Almeco FCS delivers complete industrial cooling solutions, specialising in open, closed-circuit, and adiabatic cooling towers. By integrating heat exchangers and water treatment, we ensure efficient, reliable, and sustainable performance tailored to modern industry needs.

COOLING TOWERS

We design and build cooling towers that provide large-scale, efficient cooling for industrial processes. Reliable and durable, they are built to withstand long-term use while delivering stable performance.

ADIABATIC COOLING SYSTEMS

These systems combine water mist and airflow to cool efficiently with less water consumption. They offer a sustainable alternative to traditional systems, helping industries meet environmental goals.

MAINTENANCE SERVICES

Almeco provides inspection, maintenance, and repair for all types and brands of cooling towers.

Scheduled service ensures reliability, while our experts handle repairs and deliver tailored upgrades with a full system overview and precise performance calculations.

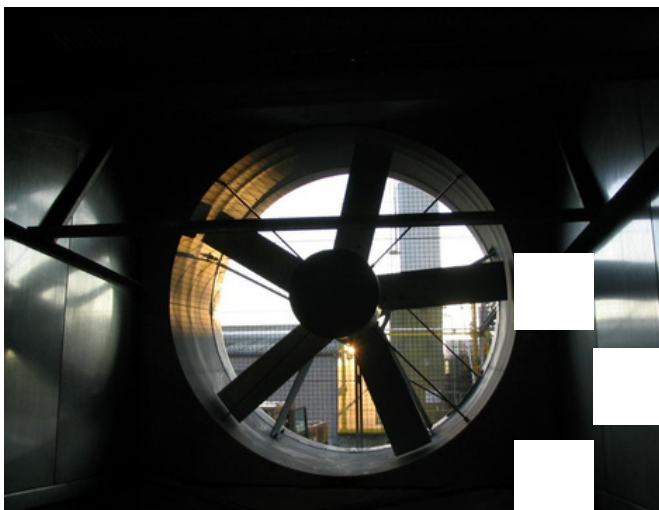

INDUSTRIAL COOLING INSTALLATIONS

Our cooling solutions are engineered to maintain stable fluid temperatures for maximum process efficiency. This leads to better product quality, improved safety, and lower energy consumption.

ENERGY-SAVING DESIGNS

Each system is designed with sustainability in mind. By optimising energy use, we reduce operational costs while supporting companies' environmental commitments.

PCA WATER

PCA Water delivers complete water and wastewater treatment systems. Our solutions help industries recycle resources, reduce costs, and stay compliant with environmental standards.

WASTE WATER TREATMENT

With decades of expertise, we deliver state-of-the-art turnkey installations that handle virtually any type of wastewater. Tailored to your needs, our solutions either recycle water for zero discharge or purify it for safe and compliant release — combining sustainability with efficiency.

PROCESS WATER TREATMENT

Industrial processes demand water of the highest quality. PCA provides customized installations that guarantee reliable results — using advanced technologies such as reverse osmosis, ultrafiltration, ion exchangers, and EDI. The result: consistent water quality, optimized performance, and peace of mind for your operations.

At PCA Water, we design, build and maintain smart water treatment systems that ensure clean, efficient and sustainable water management.

CONTROL & AUTOMATION

Automation is key to every efficient installation. At PCA, we have our own dedicated automation team and build our electrical cabinets in-house. With decades of expertise, we ensure reliable control systems and intuitive, user-friendly interfaces — often through touchscreen technology — giving operators a clear overview and effortless management of the entire process.

PCA AIR

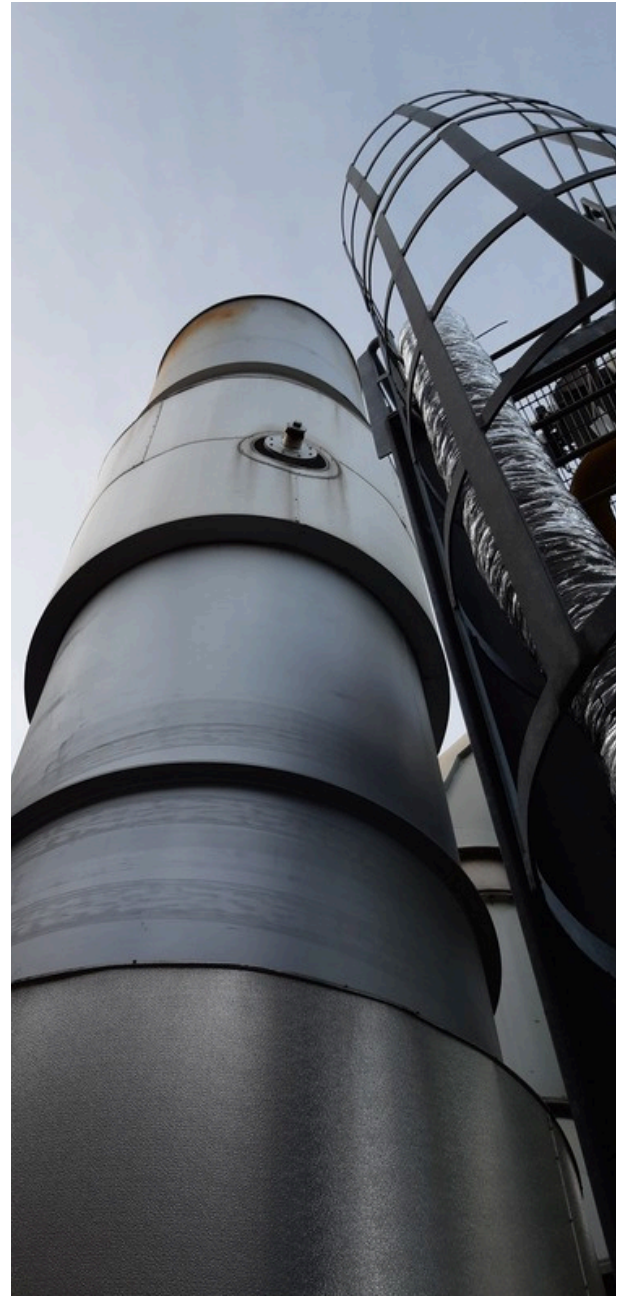

PCA Air ensures clean and safe industrial environments with innovative air cleaning and purification systems. We protect both people and processes by delivering efficient, customised solutions

AIR CLEANING

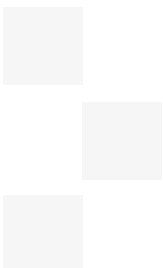

Advanced cleaning systems eliminate polluting, hazardous and toxic compounds, significantly improving air quality. They ensure emissions compliance while protecting the work environment, personnel, and equipment.

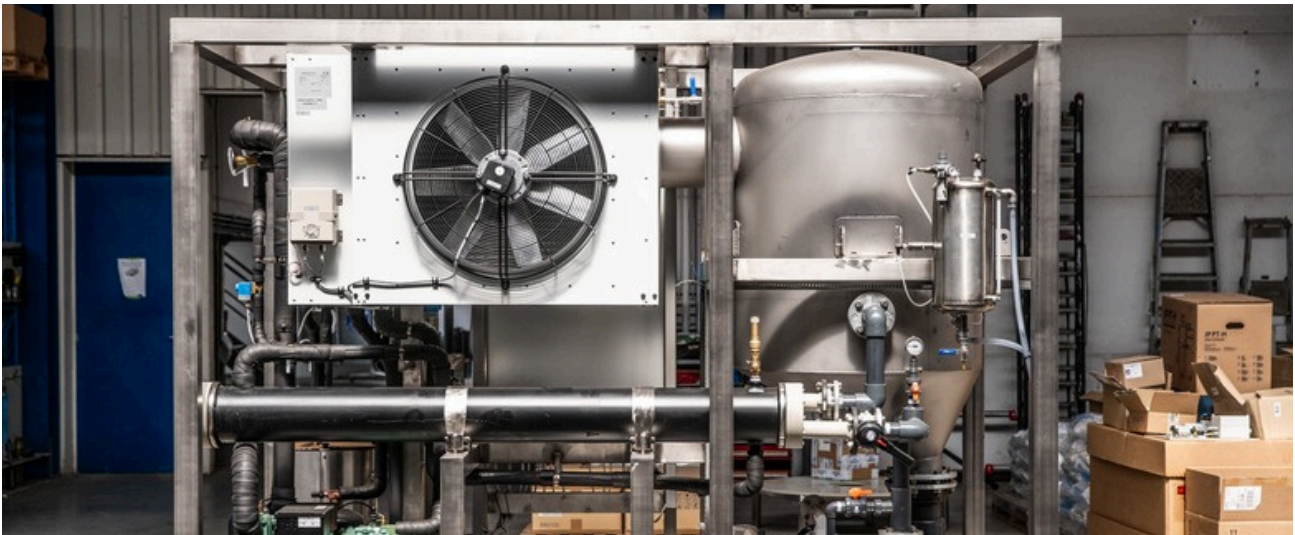

ODOR REMOVAL

Our odor control solutions neutralise industrial emissions, ensuring compliance with environmental standards and creating safer, more comfortable workplaces.

At PCA Air, we create cleaner, healthier and more sustainable industries

MATERIALS AND ENERGY OPTIMIZATION

Solutions such as heat exchangers, intelligent thermal management, and the recovery of valuable materials from air streams enhance overall process efficiency and maximize yield.

CUSTOM AIR SOLUTIONS

We design air handling systems adapted to each client's needs. This ensures optimal efficiency and long-lasting performance across

PCA CONTROL

PCA Control specialises in automation and process control. Our smart systems integrate seamlessly into industrial operations, helping clients optimise efficiency, safety, and reliability.

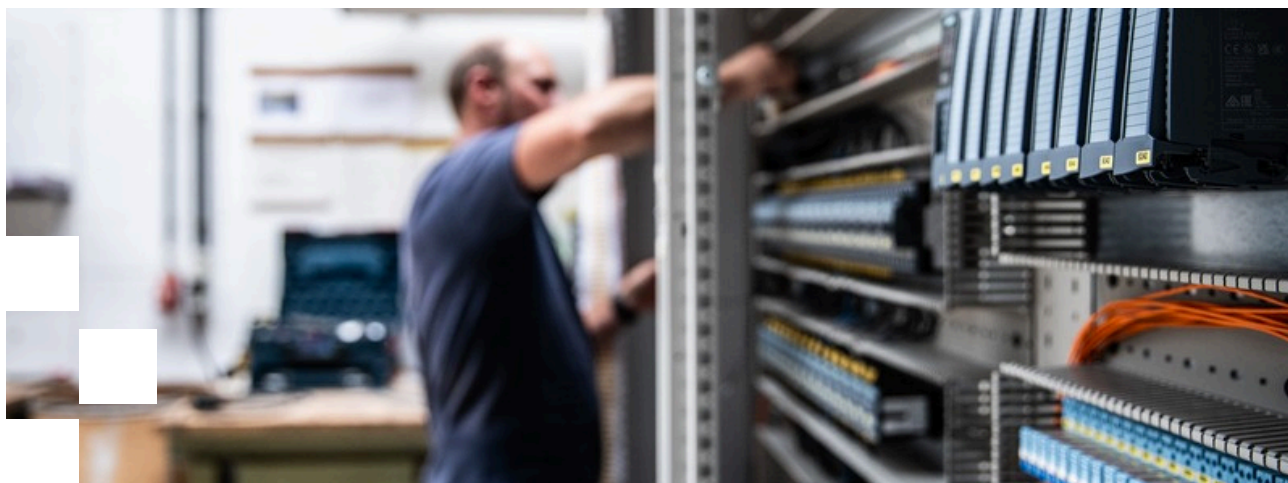

INDUSTRIAL AUTOMATION

We design automation systems that streamline processes and reduce manual intervention. This improves productivity while lowering error rates.

PROCESS MONITORING

Our monitoring solutions provide real-time insights into process performance. Clients gain transparency, improve decision-making, and ensure regulatory compliance.

At PCA Control, we optimise industrial processes through smart automation and tailor-made solutions.

INTEGRATION SOLUTIONS

We connect new and existing systems for seamless operations. This eliminates inefficiencies, reduces downtime, and maximises investment in equipment.

SMART CONTROL SYSTEMS

Intuitive platforms give operators greater control and flexibility. This ensures processes remain consistent, efficient, and safe.

PROCEQ

Proceq builds precision pressure vessels and heat exchangers. Known for compliance and engineering excellence, Proceq delivers certified, tailor-made solutions.

HEAT EXCHANGERS

We manufacture efficient heat exchangers that maximise thermal transfer while minimising energy use. This supports both sustainability and cost savings.

PRESSURE VESSELS

Designed to withstand extreme pressures and conditions, our vessels comply with international standards. Clients trust us for safety, reliability, and longevity.

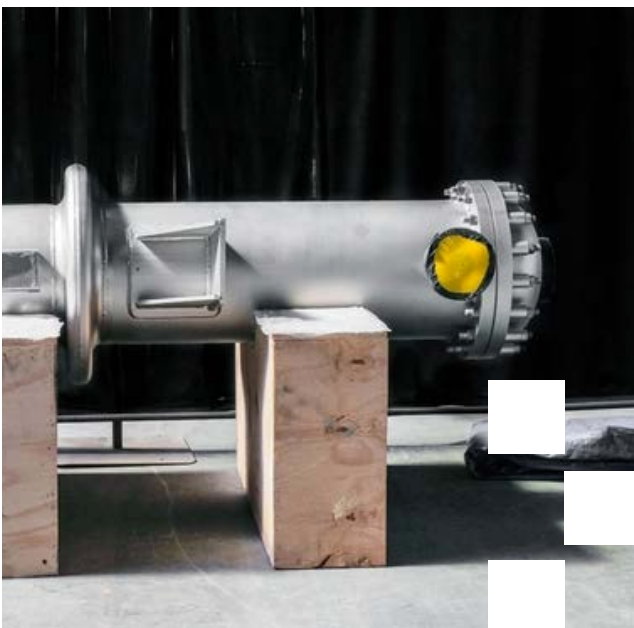

CONDENSERS AND GAS COOLERS

We recover wasted process heat with solutions such as coolers, condensers, economisers, and custom designs — always tailored to your needs and compliant with international standards.

SKIDS

Proceq designs and builds custom skids that ensure efficiency, reliability, and seamless integration with your process.

COATEQ

Coateq delivers advanced powder coating and surface treatment systems. Our flexible, high-performance lines help industries achieve durable, premium-quality finishes.

POWDER COATING LINES

Complete lines that deliver flawless coatings with speed and consistency. Clients benefit from higher throughput and reduced rework.

DRYING & CURING OVENS

Integrated ovens designed for consistent and efficient curing, reducing energy use and boosting productivity.

CHEMICAL PRE-TREATMENT

Preparing surfaces for maximum adhesion and coating durability. This step guarantees longer-lasting, more resilient finishes.

POWDER COATING EQUIPMENT

Coateq's powder coating equipment is designed for high performance, offering durability and flexibility for diverse applications.

NOVISO NC

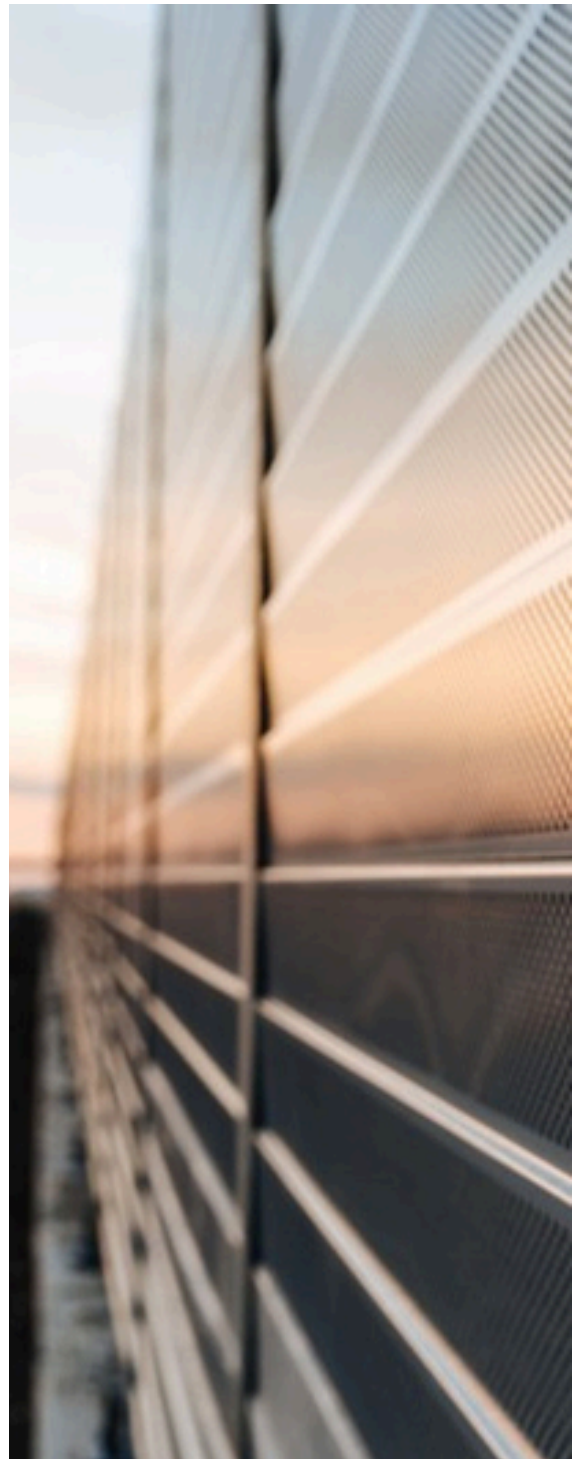

Noviso Noise and vibration Control (NC) delivers acoustic and vibration solutions that protect both people and equipment. We create safer, quieter workplaces through engineering excellence and tailored designs.

ACOUSTIC CABINS & ENCLOSURES

We design and install custom acoustic enclosures that completely isolate noisy equipment, significantly reducing sound emissions. These solutions improve working conditions, enhance operator comfort, and help industries comply with noise regulations.

SILENCERS & SOUND PANELS

We offer a comprehensive range of industrial silencers and high-performance acoustic panels designed to tackle noise at the source. From air exhaust and atmospheric discharge silencers to modular sound-absorbing panels, our solutions are engineered for durability in demanding environments.

VIBRATION ISOLATION SYSTEMS

Specialised systems are developed to minimise the transmission of vibrations throughout equipment and structures. This not only prevents structural damage but also extends the lifetime of machinery, reduces maintenance needs, and ensures smoother operations.

TAILOR-MADE ACOUSTIC SOLUTIONS

Every industrial challenge is unique. We design tailor-made acoustic and vibration control systems that take into account the specific processes, space constraints, and performance goals of each client, guaranteeing reliable and measurable results.

NOVISO IO

Noviso Industrial Oven (IO) designs and builds industrial ovens that deliver precision and efficiency. From curing to drying, our ovens guarantee consistent results with reduced energy consumption.

POLYMERISATION OVENS

Tailor-made ovens designed for coatings and curing processes, delivering uniform heat distribution and consistent, high-quality finishes that meet the most demanding industry standards.

DRYING & CURING SYSTEMS

Reliable and robust solutions for controlled drying processes, ensuring uniformity across production batches. This enhances product quality, increases throughput, and strengthens quality control measures.

Noviso creates energy-efficient ovens that guarantee reliable curing and drying for modern industry

ENERGY-EFFICIENT DESIGNS

All our ovens are engineered with energy optimisation in mind, lowering operational costs while maintaining output quality and reliability. This makes them both cost-effective and environmentally sustainable.

PROCESS PRECISION

Equipped with advanced control systems, our ovens guarantee accurate temperatures and cycle times. This precision ensures repeatable outcomes, greater reliability, and reduced downtime in industrial production.

DIMPLESTEEL

DimpleSteel specialises in pillow plate heat exchangers. Compact, durable, and efficient, our exchangers maximise energy recovery and support sustainable industrial processes.

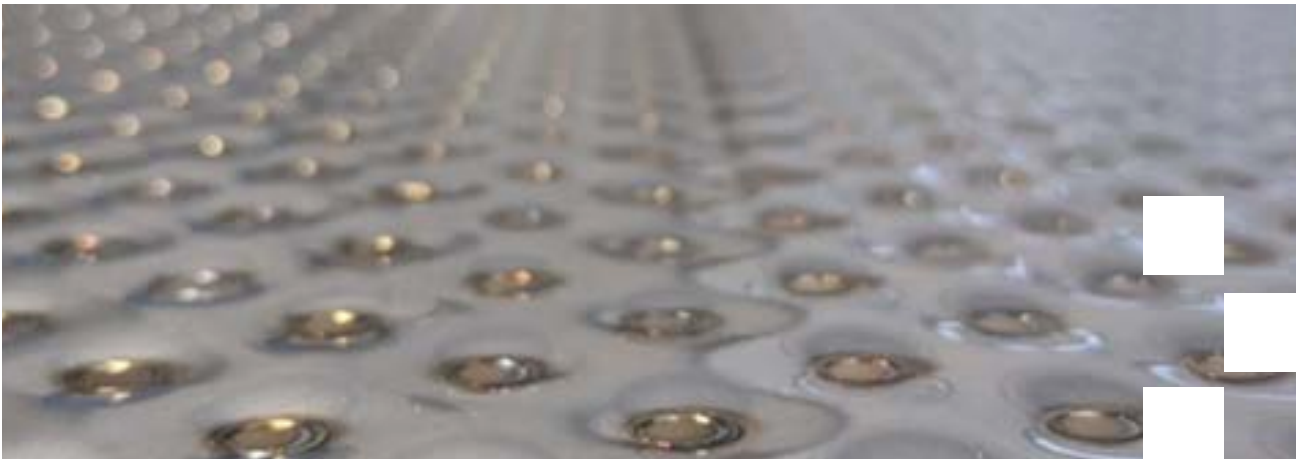

CUSTOM PLATES

Our custom pillow plates are tailored to meet unique operational demands, offering unmatched flexibility and adaptability. Whether for cooling, heating, or specialised industrial processes, we collaborate with you to create solutions that align seamlessly with your requirements.

DUCTS

DimpleSteel's pillow plate solutions, including ducts, collectors, and conveyors, deliver advanced thermal control with durability and efficiency. Ideal for demanding industries, they ensure precise temperature regulation for storage, transfer, and processing applications.

HEAT EXCHANGERS

Our pillow plate heat exchangers set the standard for thermal efficiency. Compact, customisable, and highly efficient, they are designed for a variety of industrial uses, optimising energy consumption while maintaining reliable heat transfer.

TANKS

DimpleSteel's tanks integrate pillow plate technology for exceptional thermal management. Designed for uniform temperature control, they are ideal for heating and cooling applications, providing dependable and long-lasting performance.

ENVIRO TECH

Enviro Tech combines deep expertise in water and air treatment. We design and deliver reliable, high-performance systems — backed by dedicated service, hands-on know-how, and long-term commitment to our customers.

PLASTIC PIPING SYSTEMS AND DEVICES

Whether for cleanroom piping, utility installations, or safe circulation of chemicals and water, Enviro Tech is your trusted partner for custom plastic piping systems. With years of expertise, we handle preparation, production, and installation to the highest standards. We also design extraction, ventilation, and air treatment systems, fully tailored to your needs.

TAILOR-MADE SOLUTIONS

At Enviro Tech, we don't just deliver piping systems, we deliver total solutions. From design to on-site assembly and logistics, we partner with you to solve complex challenges efficiently. Our track record of special projects proves our expertise, flexibility, and reliability.

We combine water, air, and expertise to create safer, cleaner, and more efficient industrial environments

METALWORKING

Enviro Tech is your trusted partner in metalworking, from steel and stainless steel structures to precision sheet metal and complete extraction systems. We machine steel, stainless steel, and aluminium with techniques like cutting, bending, and welding, delivering durable, customised solutions such as tanks, platforms, and more.

TRUSTED LOCAL EXPERTISE

Clients benefit from decades of proven experience, a strong track record in industrial environments, and a personalised service approach that ensures each project meets specific needs.

AKWA PLUS

Akwa Plus delivers industrial cleaning and hygiene solutions that meet the strictest standards in food, beverage, and manufacturing industries. Our systems combine efficiency with reliability, helping clients maintain safe, compliant, and productive operations.

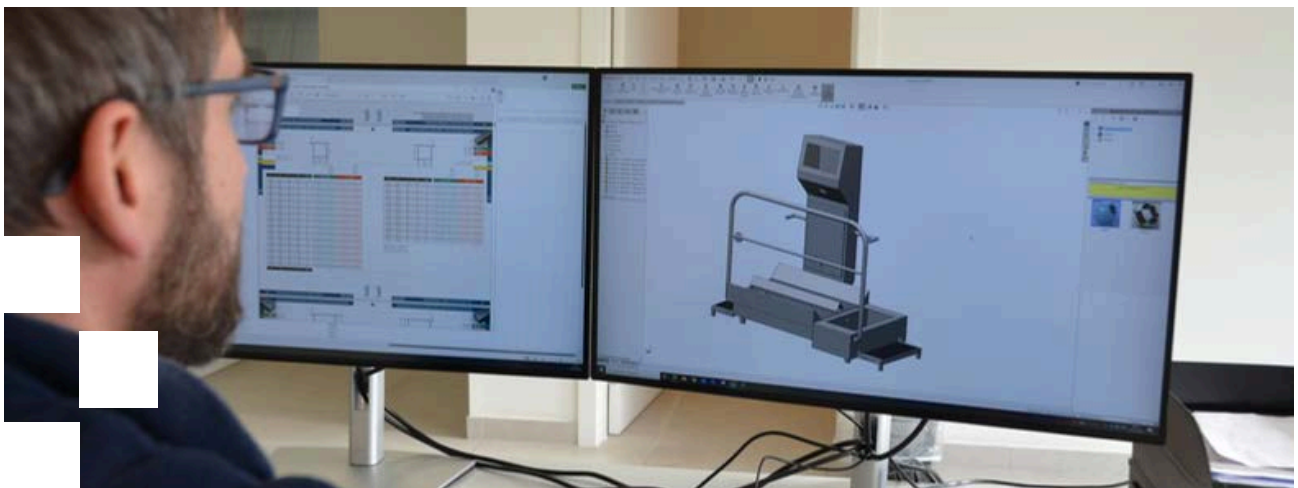

AUTOMATED DISINFECTION & FOAM SYSTEMS

Fully automated systems apply foam and disinfectant consistently across work areas. By reducing human error and labor requirements, these solutions guarantee uniform hygiene, minimise contamination risks, and keep production running smoothly.

HIGH- & MEDIUM-PRESSURE CLEANING SYSTEMS

Our cleaning systems are engineered to remove even the most stubborn dirt, grease, and residues from industrial surfaces. Designed for efficiency, they minimise water and energy consumption while ensuring fast, thorough cleaning. This enables production facilities to uphold strict hygiene standards while cutting operational costs.

CUSTOM HYGIENE INSTALLATIONS

Every facility is unique, so we design wash stations, hygiene locks, and disinfection units around your specific workflow. This ensures seamless integration, eliminates bottlenecks, and guarantees compliance with food safety and industrial regulations.

ACCESSORIES & CONSUMABLES

From hoses to reels and nozzles, our accessories are built for heavy-duty use. High-quality consumables extend system lifespan, improve reliability, and reduce downtime, giving clients peace of mind and cost savings.

They went before you

At Axon Group, our Xperts don't just apply their expertise, they leave a mark. Across industries and sectors, we've been making our presence felt by optimising processes with industrial precision. Whether it's fluids, air, powder, heat exchangers, noise and vibration isolation, or control & automation, our solutions not only elevate operations but also amplify the identity and strength of the brands we serve.

Dear reader,

This brochure has introduced you to our core values of versatility, collaboration, and innovation. These values are the foundation of our company culture and guide every decision we make.

Whether you were already familiar with us or are just getting to know us, our aim has been to provide a complete picture of our organisation. We wanted to showcase our capabilities and demonstrate how we can contribute to your success.

We invite you to connect with us online to explore our full capabilities. Follow us on LinkedIn and visit our website to learn more about our work and discover how we can collaborate to shape a better future together.

Best regards,
Team Axon Group
